Skills

React Js *Redux*	**MongoDB**	**Firebase**	**GraphQL**
	Languages: *C/C++ Java Python*	**Typescript**	**Algorithms**
Semantic HTML & CSS *SASS Tailwindcss*	**PHP**	**SQL**	**Attention to details**
NodeJs			

Profile

Enthusiastic Frontend Developer eager to contribute to team success through hard work with an ability to learn quickly, attention to detail, and excellent teamwork ability. I have a clear understanding of building websites and overall training in programming. Motivated to learn, grow and excel in web development. To seek and maintain a full-time or remote position that offers professional challenges utilizing interpersonal skills, excellent time management, and problem-solving skills.

Experience and Projects

Building full-stack apps

- I use Facebook daily and decided to make my version of it, and while developing this app I had to learn more about building a complete CRUD API from scratch using Express, Nodejs, and MongoDB. For the front-end, I matched the design perfectly with the real Facebook using SCSS and tailwindcss I also got familiar with socket.io for web sockets which allowed me to add a real-time messenger and the ability to see online users to the app, and in the future, I will add the video calling feature to the app. (**Go to app** ⧉).

Building responsive, accessible, and dynamic web pages

- I created up to 8 web apps from **frontendmentor** ⧉ and got positive feedback.
- I used MaterialUI to create visually aesthetic graphs and charts to display covide-19 status information on the **covid-tracker app** ⧉ .
- I built three websites using nextJs while I was learning it.
  - I helped myself in the gym by building a **fitness app** ⧉ that shows you all the exercises with a modern UI using SCSS and tailwindcss, and I also implemented the SSR technic and used GraphQL which helped me interact with the API and I ended up giving it to my uncle because he has a gym.
  - I built a **modern graphCMS blog** ⧉ using nextJs and typescript with a beautiful UI.
- I cloned some powerful apps like Clubhouse, LinkedIn, Medium, **Disney** ⧉ , and **Tesla** ⧉ .
- **LinkedIn** ⧉ was a great project for me to learn more about firebase and Redux.
- The **medium app** ⧉ was built with typescript,nextjs, sanity, and tailwindcss it also though me about typescript.
- The **clubhouse** ⧉ app is a mobile-first application that has the best UI.
- I made a lot of landing pages like **newBank** ⧉ , **Blogr** ⧉ , **Manage** ⧉ , and More in my GitHub profile.

Education

Computer Science,
Abou Beker Belkaid University of TLEMCEN

GPA of 16.24/20, *High school of science*

Languages

- English
- Arabic
- French
