🪪 Profile

Full-Stack Developer eager to contribute to team success through hard work with an ability to learn quickly, Motivation helped me to learn a minimum of 6-7 hours a day in the last 2 and half years. I'm looking for new challenges that push my limits.

🧠 Skills

Javascript	Javascript Libraries
React Js	Redux & Recoil
NextJs	Typescript	Firebase
MongoDB	HTML & CSS
GraphQL	NodeJs

🌐 Languages

| English | Arabic | French |

🎓 Education

Computer Science
Abou Beker Belkaid University of TLEMCEN

GPA of 16.24/20
High school of science

Over 100hr's of web development courses and data structures.

💼 Professional Experience

Gym Membership Manager
- **Tech used:** ReactJs, MaterialUI, NodeJs.
- Provided a security system to manage clients

Key achievement:
- Accelerated long-running issues of security by 70%.
- Accelerated the client subscription by 50%.

📁 Projects

Portfolio

Tech used: ReactJs, CSS, React Libraries.

- Developed a simple well-designed website to show up my latest work.

2D Game Engine (Scorpio) Java
this game engine lets you create 2d games like Mario.
NOTE! The software is still in process.

Social Media Server

Tech used: NodeJs, ExpressJs, Melter, MongoDB, socket.io.

- The Server is reusable and it served my Facebook app clone.
- It supports real-time communication thanks to web sockets.
- Learned a lot of valuable information about web sockets and how to structure a powerful secure server.

Full-stack Apps

Tech used: Reactjs, Typescript, SCSS, Firebase. SanityCMS, Redux, Recoil, MUI, NextJs
- Clone apps Like Reddit - LinkedIn - Facebook - Clubhouse - Tesla - Desniy - Medium.

RESTful API websites
- Developed a **fitness app** that shows all exercises using *GraphQL* and *Nextjs*.

⚲ Interests

GYM | Video Games

Reading software Books
